

# Tug Axis 2T STAINLESS STEEL TUG

MADE TO ORDER

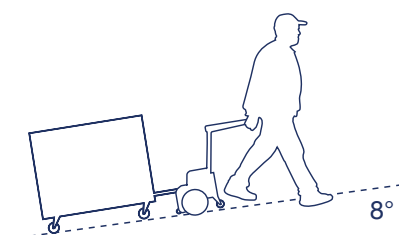

Electrodrive's specialised stainless steel Tug Axis 2T enables a single operator to safely move loads weighing up to 2,000 kg.

Made to order, this tug is not only tough and durable but also corrosion resistant. Its stainless steel body and hitch ensures longevity while maintaining hygiene in applications with sanitary requirements.

Designed to withstand humid conditions and regular cleaning/washdowns, it is ideal for use in food and beverage manufacturing, linen/laundry or healthcare/medical environments.

Suitable for transporting carts, heavy specialised equipment, or heavy trolleys.

Its ergonomic tiller handle positions the operator in front of the load. This provides maximum forward visibility, while reducing the risk of collisions with staff, objects or walls/doorways.

## Typical applications

Suitable for food/beverage manufacturers, laundry/linen or medical environments.
